

## ISCC – International Sustainability and Carbon Certification

### About this Summary Audit Report

All ISCC audits are conducted based on the applicable ISCC requirements as laid down in the ISCC System Documents. The relevant ISCC requirements are specified in audit procedures (checklists) that have to be used by auditors from the Certification Bodies (CBs) for ISCC audits. The completed audit procedures are available to the CB, the certified company and ISCC. Based on the audit procedures the CB prepares and submits this Summary Audit Report to ISCC and the certified company. The Summary Audit Report is published on the ISCC website together with further information on the ISCC certificate. The report is a tool to further enhance the transparency of the ISCC sustainability certification. It provides an overview on relevant aspects and results of the audit of a certified ISCC System User. Information and data in the report reflect the situation at the date of the audit. Only such activities, processes or materials relevant for the ISCC audit shall be included in this Summary Audit Report. The report shall not contain confidential or business sensitive information or data, including data about amounts or volumes of material, names and/or addresses of subcontractors or service providers, clients, customers, or others. Therefore, data on volumes of sustainable material is provided on a voluntary basis only. The Summary Audit Report has to be provided for all ISCC certified System User, and the publication on the ISCC Website is mandatory.

The layout of this report is provided by ISCC to enable a harmonised approach and to foster the comparability. The CB is responsible for correctness of the information provided.

## 1 About ISCC

ISCC – International Sustainability and Carbon Certification – is a solution provider for the implementation and certification of sustainable, traceable and deforestation-free supply chains. ISCC certification covers supply chains for all kinds of biomass (including agricultural and forest biomass), biogenic waste and residues, non-biological renewable materials and recycled carbon-based materials. ISCC certification ensures comformity with strict requirements regarding ecological and social practices, greenhouse gas emissions savings and traceability of materials throughout the supply chain. ISCC certification is applicable for the bioeconomy and the circular enconomy anywhere in the world, in particular for food, feed, energy (fuels, electricity, heating and cooling) and industrial applications.

ISCC is an independent multi-stakeholder initiative that has been developed and is being continiously improved with the involvement of its stakeholders. The ISCC system is governed by the legally registered ISCC Association (ISCC e.V.). ISCC certifications are conducted by independent third-party Certification Bodies (CB) cooperating with ISCC.

### 2 Information on the Certification Body

| Name of CB:  | Intertek Utama Services  |
|--|--|
| Description and<br>additional information:<br>(e.g. relevant<br>recognitions or<br>accreditations,<br>authorities responsible<br>for recognition,<br>accreditation,<br>surveillance and/ or<br>monitoring) | PT Intertek Utama Services is accredited with ISO 17065 and 14065<br>by recognized national accreditation body: Komisi Akreditasi Nasional<br>(KAN) – Indonesia in 2017. |
| CB email:  | aryati.larasati@Intertek.com   |

1. Information mandatory for individually certified farms and plantations

2. In their version applicable at the date of the audit (system documents are available at www.iscc-system.org)

3. Please only list systems with comparable scopes. For ISCC EU in particular those systems which are recognised under RED II are relevant and national schemes like the Italian National Scheme, Dutch Double Counting etc. This also includes documentation requirements from countries to fulfil sustainable fuels mandates (e.g. documentation for the Norwegian biofuel legislation). For ISCC PLUS in addition traceability databases for biogas/ biomethane trading (e.g. Vertogas (NL), Green Gas (UK)), for wood-based feedstocks (e.g. PEFC, FSC) and other voluntary schemes for circular and/ or bio-based industrial applications like e.g. RSPO or EuCertPlast are relevant.

\* Applicable for physical input and output. Not applicable for material which is only traded on a "paper" basis

- \*\* Applicable for certification of First Gathering Points, Central Offices (farms/ plantations), Central Offices (independent smallholders) and individual certified farms/plantations
- \*\*\* Applicable for certification of First Gathering Points, Central Offices and Collecting Points
- Smallholders are farmers growing a cash crop alongside other subsistence crops on areas usually smaller than 50 ha. The smallholding farm generally provides the main source of income for the family owning the land, and the family usually conducts most of the labour
- <sup>2</sup> "NUTS2-equivalent" values: GHG values for cultivation in a "NUTS2-equivalent" region of a country outside the European Union (values are implemented by the European Commission)

# 3.5 Summary of Audit Results

| Audit results per chapte   | Audit results per chapter of the ISCC Audit Procedures:  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|--|
| Chapter  | Number of detected major<br>non-conformities<br>(for main and sample audits)   | Number of detected minor<br>non-conformities<br>(for main and sample audits) |  |  |  |  |  |
| Management System  |  |  |  |  |  |  |  |
| Traceability   |  |  |  |  |  |  |  |
| Chain of Custody   |  |  |  |  |  |  |  |
| GHG  |  |  |  |  |  |  |  |
| Farms / Plantations or<br>Forest Sourcing Areas  |  |  |  |  |  |  |  |
| ISCC Principle 1   | Violations of ISCC Principle 1 are critical no corrective measures   | n-conformities and cannot be subject to                                      |  |  |  |  |  |
| ISCC Principle 2   |  |  |  |  |  |  |  |
| ISCC Principle 3   |  |  |  |  |  |  |  |
| ISCC Principle 4   |  |  |  |  |  |  |  |
| ISCC Principle 5   |  |  |  |  |  |  |  |
| ISCC Principle 6   |  |  |  |  |  |  |  |
| Point of Origin  |  |  |  |  |  |  |  |
| Implementation status of mandatory   |  | Not corrected  |  |  |  |  |  |
| Corrective measures  | Note: Under ISCC all non-conformities with mandatory requirements must be implemented before a certificate can be issued |  |  |  |  |  |  |
| Status of voluntary improvement  | Fully implemented  | Partially implemented  |  |  |  |  |  |
| measures   | Not (yet) implemented  | No voluntary improvement measures defined                                    |  |  |  |  |  |
| Remarks, observations<br>of best practices and<br>recommendations<br>relevant for ISCC audit |  |  |  |  |  |  |  |
|  | (To be provided on a voluntary basis)  |  |  |  |  |  |  |
