

ISCC – International Sustainability and Carbon Certification

About this Summary Audit Report

All ISCC PLUS audits are conducted based on the applicable requirements, as laid down in the ISCC PLUS System Documents. The relevant ISCC PLUS requirements are also specified in audit procedures, which have to be used by auditors from the Certification Bodies (CBs) for ISCC audits. The completed audit procedures are available to the CB, the certified company and ISCC. Based on the audit procedures, the CB prepares and submits this ISCC PLUS Summary Audit Report to ISCC and the certified company. The ISCC PLUS Summary Audit Report is published on the ISCC website together with further information on the ISCC PLUS certificate. The report is a tool to further enhance the transparency of the ISCC PLUS certification. It provides an overview on relevant aspects and results of the audit of an ISCC-certified System User. Information and data in the report reflect the situation at the date of the audit. Only such activities, processes or materials relevant for the ISCC PLUS audit shall be included in this ISCC PLUS Summary Audit Report. The report shall not contain confidential or business sensitive information or data, including data about amounts or volumes of material, names and/or addresses of subcontractors or service providers, clients, customers, or others. Therefore, data on volumes of certified material is provided on a voluntary basis only. The ISCC PLUS Summary Audit Report has to be provided for all ISCC-certified System Users, and the publication on the ISCC Website is mandatory.

The layout of this report is provided by ISCC to enable a harmonised approach and to foster the comparability. The CB is responsible for the correctness of the information provided.

1 About ISCC

ISCC – International Sustainability and Carbon Certification – is a solution provider for the implementation and certification of sustainable, traceable and deforestation-free supply chains. ISCC certification covers supply chains for all kinds of biomass (including agricultural and forest biomass), biogenic waste and residues, non-biological renewable materials and recycled carbon-based materials. ISCC certification ensures conformity with strict requirements regarding ecological and social practices, greenhouse gas emissions savings and traceability of materials throughout the supply chain. ISCC certification is applicable for the bioeconomy and the circular economy anywhere in the world, in particular for food, feed, energy (fuels, electricity, heating and cooling) and industrial applications.

ISCC is an independent multi-stakeholder initiative that has been developed and is being continuously improved with the involvement of its stakeholders. The ISCC system is governed by the legally registered ISCC Association (ISCC e.V.). ISCC certifications are conducted by independent third-party Certification Bodies (CB) cooperating with ISCC.

2 Information on the Certification Body

Name of CB:	SCS Global Services
Description and additional information: (e.g. relevant recognitions or accreditations, authorities responsible for recognition, accreditation, surveillance and/or monitoring)	
CB email:	
CB website:	www.scsglobalservices.com

ISCC PLUS Summary Audit Report

3 System User and Audit Process

3.1 ISCC System User (Operational Site Registered for Certification)

Company name	OCTAL SAOC (FZC)			
Address	SALALAH FREE ZONE - RYSUT PO BOX 3786 - 112 Salalah			
Country	Oman			
Geo coordinates ¹	Latitude	16.940026	Longitude	53.978653
Contact details of relevant department				
Date(s) of the audit	13.05.2026 - 15.05.2026			
Place of audit if different from address stated above (Only applicable for traders)	On-site			
Certification system audited ²	ISCC PLUS <input checked="" type="checkbox"/>			
Chain of custody option applied	Mass Balance <input checked="" type="checkbox"/>	Physical Segregation <input type="checkbox"/> Identity preserved (hard IP) <input type="checkbox"/> Bulk Commodity (soft IP) <input type="checkbox"/>		Controlled Blending <input type="checkbox"/>
Year of first ISCC certification	2025			
Other sustainability certification system(s) used ³	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> o KIWA - chemical recycling certification IN 15.343 – valid till 14.1.2028 (such scheme replaces previous certification according to AFNOR scheme); o SCS-RC V8.0 - recycled co[...]			
Date of issuance of this Summary Audit Report	15.05.2026			

1. Information mandatory for individually certified Farms and Plantations
2. In their version applicable at the date of the audit (ISCC System Documents are available at www.iscc-system.org).
3. Please only list systems with comparable scopes like traceability databases for biogas/ biomethane trading (e.g. Vertogas (NL), Green Gas (UK)), national or international schemes, and other voluntary schemes for circular and/or bio-based materials/products like e.g. RSPO, RecyClass, PEFC, FSC.

3.2 CB Audit Team

Auditing team ^{4,5}	Lead Auditor - Piero Ausonio Bianco Waste and residue expert - Piero Ausonio Bianco
------------------------------	--

4. A GHG Expert has only to be named if individual GHG calculation is applied.

5. A Waste and Residue Expert has only to be named if a waste and residue process is audited.

3.3 Risk Assessment

Please refer to the System Document *ISCC PLUS 204 - Risk Management* for the different aspects of risk assessment considered by the auditor, such as risk for traceability and documentation, risk for waste and residues (e.g. false claims or intentional production), risk for sampling.

Assurance level of the audit ⁶	<input checked="" type="checkbox"/> Limited assurance		<input type="checkbox"/> Reasonable assurance		
Result of the risk assessment	<input checked="" type="checkbox"/> Regular	<input type="checkbox"/> Medium		<input type="checkbox"/> High	
Risk indicators taken into consideration for the risk assessment	<p>- Determination, structuring, organization and documentation of the number of workflows and their complexity (in-house processes); - In-house quality management system, internal audits (structure and documentation); - Yield or conversion factors in internal processes, especially if several products with different conversion factors are processed; - Accuracy of records and documents ; - Degree of topicality, frequency of updating records and documents; - Accessibility of records and documents; - Completeness of records and documents; - Lack of experience in management of sustainability requirements; - Political issues of the area (Iran war, with some interruption of activities due to safety reason); - Activities done in the period of expired certification due to external reason (war conditions in Oman)</p>				
Tools and sources used to determine risk factor	<p>According to ISCC EU 204 "Risk management" (v4.1);; - interview with the System User, ; - assessment of the documentation provided to the auditor before and during the audit resulted in regular risk being applied; - auditor experience in the area.</p>				
Risk level applied for traceability	<input checked="" type="checkbox"/> Regular		<input type="checkbox"/> Medium		<input type="checkbox"/> High
Sampling applied during the audit	<input type="checkbox"/> Yes			<input checked="" type="checkbox"/> No	
Scope(s) audited based on a sample	<input type="checkbox"/> Small-holders, Farms/ Plantations, Forrest Sourcing Areas	<input type="checkbox"/> Points of Origin	<input type="checkbox"/> Storage Facilities	<input type="checkbox"/> Dependent Collecting Points	<input type="checkbox"/> Final Product Refinement (FPR) group certification
	<input checked="" type="checkbox"/> n.a.	<input checked="" type="checkbox"/> n.a.	<input checked="" type="checkbox"/> n.a.	<input checked="" type="checkbox"/> n.a.	<input checked="" type="checkbox"/> n.a.
Risk level applied for sampling	<input type="checkbox"/> Regular	<input type="checkbox"/> Regular	<input type="checkbox"/> Regular	<input type="checkbox"/> Regular	<input type="checkbox"/> Regular
	<input type="checkbox"/> Medium	<input type="checkbox"/> Medium	<input type="checkbox"/> Medium	<input type="checkbox"/> Medium	<input type="checkbox"/> Medium
	<input type="checkbox"/> High	<input type="checkbox"/> High	<input type="checkbox"/> High	<input type="checkbox"/> High	<input type="checkbox"/> High

ISCC PLUS Summary Audit Report

<p>Total number(s) of operations relevant for calculating the sample size</p>	<p>Smallholders: Farms or Plantations: Forest Sourcing Areas: Points of Origin: Storage Facilities: Dependent Collecting Points: FPR group members :</p>
<p>Number(s) of audits based on sampling</p>	<p>Smallholders: Farms or Plantations: Forest Sourcing Areas: Points of Origin: Storage Facilities: Dependent Collecting Points: FPR group members :</p>

6. As defined by ISAE 3000 (revised).

ISCC PLUS Summary Audit Report

List of FPR activities			
List of outsourced FPR activities			
GHG option applied for outgoing certified material <small>(Only applicable if GHG add-on is used)</small>	<input type="checkbox"/> Total default value	<input type="checkbox"/> Disaggregated default value	
	<input type="checkbox"/> Actual value	<input type="checkbox"/> NUTS2 value or “NUTS2-equivalent” value ¹¹	
	<input checked="" type="checkbox"/> Voluntary add-on “GHG Emissions” was not applied (only relevant for ISCC PLUS)		
GHG bonus and/or saving factors applied	<input type="checkbox"/> None	<input type="checkbox"/> e _{sca}	<input type="checkbox"/> e _{ccs}
		<input type="checkbox"/> e _{ccr}	<input type="checkbox"/> e _B

7. Applicable for physical input and output. Not applicable for material which is only traded on a “paper” basis.
8. Applicable for certification of First Gathering Points, Central Offices (Farms/Plantations), Central Offices (Independent Smallholders) and individual certified Farms/Plantations.
9. Smallholders are farmers growing a cash crop alongside other subsistence crops on areas usually smaller than 50 ha. The smallholding farm generally provides the main source of income for the family owning the land, and the family usually conducts most of the labour.
10. Applicable for certification of First Gathering Points, Central Offices and Collecting Points.
11. “NUTS2 or NUTS2-equivalent” values: To determine GHG emissions from cultivation the use of typical values that represent the average value in a specific area is also possible. Those typical values are often referred to as NUTS2 values. Those NUTS2 or typical values have to be reported to the European Commission by Member States or third countries and can be used if the Commission recognizes them to be accurate.

3.5 Summary of Audit Results

Audit results per chapter of the ISCC PLUS Audit Procedures:

Chapter	Number of detected major non-conformities (for main and sample audits)	Number of detected minor non-conformities (for main and sample audits)
Management System		
Traceability		1
Chain of Custody		
GHG		
Farms/Plantations or Forest Sourcing Areas		
ISCC Principle 1	Violations of ISCC Principle 1 are critical non-conformities and cannot be subject to corrective measures	
ISCC Principle 2		
ISCC Principle 3		
ISCC Principle 4		
ISCC Principle 5		
ISCC Principle 6		
Point of Origin		
Implementation status of mandatory corrective measures	<input checked="" type="checkbox"/> Corrected <input type="checkbox"/> Not corrected <input type="checkbox"/> Not applicable Note: Under ISCC all non-conformities with mandatory requirements must be implemented before a certificate can be issued
