

ISCC – International Sustainability and Carbon Certification

About this Summary Audit Report

All ISCC EU audits are conducted based on the applicable ISCC EU requirements as laid down in the ISCC EU System Documents. The relevant ISCC EU requirements are specified in audit procedures that have to be used by auditors conducting ISCC audits under the respective cooperating Certification Body (CB). The completed audit procedures are available to the CB, the certified entity and ISCC. Based on the audit procedures the CB prepares and submits this Summary Audit Report to ISCC and the certified entity. The Summary Audit Report is published on the ISCC website together with further information on the ISCC EU certificate. The Report is a tool to further enhance the transparency of the ISCC EU certification. It provides an overview on relevant aspects and results of the audit of a certified ISCC EU System User. Information and data in the Report reflect the situation at the date of the audit. Only such activities, processes or materials relevant for the ISCC EU audit shall be included in this Summary Audit Report. The Report shall not contain confidential or business sensitive information or data, names and/or addresses of subcontractors or service providers, clients or customers. Therefore, data on volumes of certified material is provided on a voluntary basis only. The Summary Audit Report has to be provided for all ISCC EU certified System Users and the publication on the certificate database of the ISCC website is mandatory.

The layout of this Report is provided by ISCC to enable a harmonised approach and to foster the comparability. The CB is responsible for correctness of the information provided.

1 About ISCC

ISCC – International Sustainability and Carbon Certification – is a solution provider for the implementation and certification of sustainable, traceable and deforestation free supply chains. ISCC certification covers supply chains for all kinds of biomass (including agricultural and forest biomass), biogenic waste and residues, non-biological renewable materials and recycled carbon-based materials. ISCC certification ensures conformity with strict requirements regarding ecological and social practices, greenhouse gas emissions savings and traceability of materials throughout the supply chain. ISCC certification is applicable for the bioeconomy and the circular economy anywhere in the world, in particular for food, feed, energy (fuels, electricity, heating and cooling) and industrial applications.

ISCC is an independent multi-stakeholder initiative that has been developed and is being continuously improved with the involvement of its stakeholders. The ISCC system is governed by the legally registered ISCC Association (ISCC e.V.). ISCC certifications are conducted by independent third-party Certification Bodies (CB) cooperating with ISCC.

2 Information on the Certification Body

Name of CB:	SCS Global Services
Description and additional information: (e.g. relevant recognitions or accreditations, authorities responsible for recognition, accreditation, surveillance and/or monitoring)	SCS Global Services is chartered in the State of California as a Benefit Corporation. SCS provides third-party auditing and certification to create materially positive impacts on society and the environment. SCS coordinates a professional team of auditors working remotely around the globe and collaborating among experts in renewable energy, circular materials, and GHG lifecycle accounting.
CB email:	info@SCSglobalservices.com
CB website:	https://www.scsglobalservices.com/

3 System User and Audit Process

3.1 ISCC System User (Operational Site Registered for Certification)

Company name	WM Renewable Energy - Salem			
Address	Lee Road 183 4210 - 36804 Opelika, Alabama			
Country	United States			
Geo coordinates ¹	Latitude	32.653704	Longitude	-85.259557
Contact details of relevant department				
Date(s) of the audit	08.04.2026 - 26.05.2026			
Place of audit if different from address stated above (Only applicable for traders)	On-site			
Certification scheme(s) audited ²	ISCC EU <input checked="" type="checkbox"/>			
Chain of custody option applied	Mass Balance <input checked="" type="checkbox"/>	Physical Segregation <input type="checkbox"/> Identity preserved (hard IP) <input type="checkbox"/> Bulk Commodity (soft IP) <input type="checkbox"/>		
Year of first ISCC certification				
Other sustainability certification system(s) used ³	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>		
	Renewable Fuel Standard (RFS), ISCC PLUS			
Date of issuance of this Summary Audit Report	01.06.2026			

1. Information mandatory for individually certified Farms and Plantations

2. In their version applicable at the date of the audit (ISCC System Documents are available at www.iscc-system.org). For audits conducted as of 21 May 2025 the version 4.2 of ISCC EU System Documents is applicable.

3. Please only list systems with comparable scopes. For ISCC EU in particular those systems which are recognised under RED III are relevant and national schemes like the Italian National Scheme, Dutch Double Counting etc. This also includes documentation requirements from countries to fulfil sustainable fuels mandates (e.g. documentation for the Norwegian biofuel legislation).

ISCC EU Summary Audit Report

Scope certified	<input type="checkbox"/> Farm/Plantation	<input type="checkbox"/> Forest Sourcing Area	<input type="checkbox"/> First Gathering Point	<input type="checkbox"/> Central Office (Farms/ Plantation)
	<input type="checkbox"/> Central Office (Smallholders) ⁴	<input type="checkbox"/> Central Office (Points of Origin)	<input type="checkbox"/> Point of Origin	<input checked="" type="checkbox"/> Collecting Point
	<input type="checkbox"/> Warehouse	<input type="checkbox"/> Logistic Centre	<input type="checkbox"/> Trader with storage	<input type="checkbox"/> Trader
	<input type="checkbox"/> MTBE Plant	<input type="checkbox"/> ETBE Plant	<input type="checkbox"/> Biomarine Fuel Operator	<input checked="" type="checkbox"/> Processing Unit: Please specify below
	Type(s) of Processing Unit:	Biomethane Plant		
	Is the Processing Unit producing final Biofuels/bioliquids/biomass fuels?		Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
	If yes, was the Processing Unit already in operation on or before 5 October 2015?		Yes <input type="checkbox"/>	No <input type="checkbox"/>
	Is the Processing Unit producing electricity, heating or cooling from biomass fuels?		Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
If yes, was the Processing Unit already in operation on or before 1 January 2021?		Yes <input type="checkbox"/>	No <input type="checkbox"/>	
Voluntary Add-ons (if applicable)	<input checked="" type="checkbox"/> No add-ons applied	<input type="checkbox"/> EU Deforestation Regulation (EUDR)	<input type="checkbox"/> Food Security Standard (FSS)	
		<input type="checkbox"/> Non-GMO for Food and Feed	<input type="checkbox"/> Non-GMO for Technical Markets	

3.2 CB Audit Team

Auditing team ^{5, 6}	Lead Auditor - Jonathon Polly GHG expert - Jonathon Polly
-------------------------------	--

4. Smallholders (individual smallholders, or ISH) are farmers growing a cash crop alongside other subsistence crops on areas usually smaller than 50 ha. The smallholding farm generally provides the main source of income for the family owning the land, and the family usually conducts most of the labour.

5. A GHG Expert has only to be named if individual GHG calculation is applied

6. A Waste and Residue Expert has only to be named if a waste and residue process is audited.

3.3 Risk Assessment

Please refer to ISCC EU System Document 204 "Risk Assessment" for the different aspects of risk assessment to be considered by the auditor, such as risk for traceability and documentation, risk for waste and residues (e.g. false claims or intentional production), risk for sampling.

Assurance level of the audit ⁷	<input type="checkbox"/> Limited assurance		<input checked="" type="checkbox"/> Reasonable assurance	
Result of the risk assessment	<input checked="" type="checkbox"/> Regular		<input type="checkbox"/> Medium	<input type="checkbox"/> High
Risk indicators taken into consideration for the risk assessment	All risk factors outlined in section 3.2.1 of ISCC EU 204 were considered for this audit.			
Tools and sources used to determine risk factor	The risk factor was determined according to section 3.2.2 of ISCC EU 204 and based on a review of documentation provided, interviews with relevant personnel, and a site visit. No reason for abnormal risk was determined, so a regular risk factor was assigned.			
Risk level applied for traceability	<input checked="" type="checkbox"/> Regular		<input type="checkbox"/> Medium	<input type="checkbox"/> High
Sampling applied during the audit	<input checked="" type="checkbox"/> Yes		<input type="checkbox"/> No	
Scope(s) audited based on a sample	<input type="checkbox"/> Smallholders, Farms/ Plantations/ Forest Sourcing Areas	<input checked="" type="checkbox"/> Points of Origin	<input type="checkbox"/> External/ dependent storage facilities ⁸	<input type="checkbox"/> Dependent Collecting Points
	<input checked="" type="checkbox"/> n.a.	<input type="checkbox"/> n.a.	<input checked="" type="checkbox"/> n.a.	<input checked="" type="checkbox"/> n.a.
Risk level applied for sampling	<input type="checkbox"/> Regular <input type="checkbox"/> Medium <input type="checkbox"/> High	<input checked="" type="checkbox"/> Regular <input type="checkbox"/> Medium <input type="checkbox"/> High	<input type="checkbox"/> Regular <input type="checkbox"/> Medium <input type="checkbox"/> High	<input type="checkbox"/> Regular <input type="checkbox"/> Medium <input type="checkbox"/> High

ISCC EU Summary Audit Report

<p>Total number(s) of operations relevant for calculating the sample size</p>	<p>Individual Smallholders: Farms or Plantations: Forest Sourcing Areas: Points of Origin: 1 External/ dependent storage facilities: Dependent Collecting Points:</p>
<p>Number of sites audited</p>	<p>Individual Smallholders: Farms or Plantations: Forest Sourcing Areas: Points of Origin: 1 External/ dependent storage facilities: Dependent Collecting Points:</p>

7. Assurance level as defined by ISAE 3000 (revised). For rules on application of the assurance levels, please refer to ISCC EU System Document 103 (version 4.2).
8. For ISCC EU, sampling of DCPs and external storage facilities used by Collecting Points and Central Offices for points of origin is not possible. All external sites have to be audited (see ISCC EU 203 System Document, Chapters 3.4.6 and 3.4.7).

3.4 Summary of Activities

Amount of sustainable ⁹ input material (in mt) ¹⁰	(This information can be provided on a voluntary basis as this may be commercially sensitive information)			
Raw materials with country of origin ¹⁰	Biogas (organic municipal solid waste) - The United States of America			
Sustainable output material ¹⁰	Biomethane (organic municipal solid waste)			
Please indicate the type(s) of sustainable materials traded				
(applicable for certification of Traders only)	<input type="checkbox"/> Raw materials	<input type="checkbox"/> Intermediate products	<input type="checkbox"/> Final products	
Type(s) of operators supplying sustainable biomass ¹¹	<input type="checkbox"/> Smallholders	<input type="checkbox"/> Farms	<input type="checkbox"/> Plantations	<input type="checkbox"/> Forest Sourcing Areas
Total number of producers supplying sustainable biomass ¹¹				
Total production area of all producers supplying sustainable biomass (in ha) ¹¹	<input type="checkbox"/> 1 – 500 <input type="checkbox"/> 500 – 5,000 <input type="checkbox"/> 5,000 - 20,000 <input type="checkbox"/> > 20,000	<input type="checkbox"/> 1 – 500 <input type="checkbox"/> 500 – 5,000 <input type="checkbox"/> 5,000 - 20,000 <input type="checkbox"/> > 20,000	<input type="checkbox"/> 1 – 500 <input type="checkbox"/> 500 – 5,000 <input type="checkbox"/> 5,000 - 20,000 <input type="checkbox"/> > 20,000	<input type="checkbox"/> 1 – 500 <input type="checkbox"/> 500 – 5,000 <input type="checkbox"/> 5,000 - 20,000 <input type="checkbox"/> > 20,000
Supplying Farm(s) controlled by European Cross Compliance ¹¹	Yes <input type="checkbox"/> No <input type="checkbox"/>			
	Note: If supplying farms were controlled by European Cross Compliance (CC) only ISCC Principle 1 was verified at the audit. ISCC Principles 2 – 6 are covered by the Cross Compliance controls.			
Information on volumes supplied by biomass producers or points of origin (in mt per raw material) ¹²	(To be provided on a voluntary basis as this may be commercially sensitive information. For agricultural producers of oil palm fresh fruit bunches this information is compulsory)			

ISCC EU Summary Audit Report

GHG option applied for outgoing sustainable material (Multiple options possible)	<input type="checkbox"/> Total default value		<input type="checkbox"/> Disaggregated default value	
	<input checked="" type="checkbox"/> Actual value		<input type="checkbox"/> NUTS2 value or “NUTS2-equivalent” value ¹³	
GHG bonus and/or saving factors applied	<input checked="" type="checkbox"/> None	<input type="checkbox"/> e _{sca}	<input type="checkbox"/> e _{ccs}	
		<input type="checkbox"/> e _{ccr}	<input type="checkbox"/> e _B	

9. Please note that FGP/CP/Central Offices receive input material from group members which are not individually certified, therefore the input material is received by the first certified element of the supply chain via means of a self-declaration.
10. Applicable for physical input and output. Not applicable for material which is traded on a “paper” basis.
11. Applicable for certification of First Gathering Points, Central Offices (for farms/ plantations), Central Offices (for independent smallholders) and individual certified farms/plantations.
12. Applicable for certification of First Gathering Points, Central Offices and Collecting Points.
13. “NUTS2 or NUTS2-equivalent” values: To determine GHG emissions from cultivation the use of typical values that represent the average value in a specific area is also possible. Those typical values are often referred to as *NUTS2 values*. Those NUTS 2 or typical values have to be reported to the European Commission by Member States or third countries and can be used if the Commission recognizes them to be accurate.

3.5 Summary of Audit Results

Audit results per chapter of the ISCC EU Audit Procedures:

Chapter	Number of detected major non-conformities (for main and sample audits)	Number of detected minor non-conformities (for main and sample audits)
Management System		
Traceability		
Chain of Custody		
GHG		
Farms / Plantations or Forest Sourcing Areas		
ISCC Principle 1	Violations of ISCC Principle 1 are critical non-conformities and cannot be subject to corrective measures	
ISCC Principle 2		
ISCC Principle 3		
ISCC Principle 4		
ISCC Principle 5		
ISCC Principle 6		
Point of Origin		
Implementation status of mandatory corrective measures	<input checked="" type="checkbox"/> Corrected <input type="checkbox"/> Not corrected <input type="checkbox"/> Not applicable Note: Under ISCC all non-conformities with mandatory requirements must be implemented before a certificate can be issued
